### More on the Affordable Mail Alliance

The Affordable Mail Alliance is an unprecedented coalition of postal customers who have come together to say "enough is enough" – no more postal rate hikes. The coalition includes charities, consumer groups, small business, national retailers, utilities, banks, insurance companies, Fortune 500 companies, and the customers who use the Post Office every day. The members represent many of the Postal

Service's biggest customers—and many of its smallest—and use every major class of mail. It is this cross-section of America that will suffer if USPS raises rates.
